Education

- 2023 **Bachelor in Computer Science**, *University of Padua*, Padua, Italy, 91/110
- 2023-Current **Master in Computer Science**, *University of Padua*, Padua, Italy
- 2025 **Erasmus Exchange**, *University of Helsinki*, Helsinki, Finland

Projects

- 2024 **Social Network Analysis on TikTok**
The goal was to measure the presence of echo chambers in the US political landscape. Ten politically relevant TikTok accounts have been selected, respectively five left-leaning and five right-leaning. Then, data from said accounts were collected to measure their activity and perform a social network analysis on their followers.

- 2025 **Interactive Data Visualizer**
Visualize Europe's political leaning by state from 2009 to 2024. All data were taken from Eurostat official databases. The visualization, made with Plotly, consists of a map of Europe where each state is coloured based on its election results (from far right to far left), and a line chart which shows three metrics: net earnings, immigration and poverty risk.

- 2025 **Pygame Showcaser for Raft Consensus Algorithm**
Bare-bones Travian clone made in Pygame that showcases some of the Raft consensus algorithm's base functionality. The project leverages multithreading and remote procedure calls to achieve the desired results.

Skills & Experience

Spoken languages Italian (native), English (C1 - TOEFL 108/120)

CS Skills Python, R, C++, Dart, Java, SQL, HTML, $\text{\LaTeX}$, Git, QML, GDScript.

Teaching skills I have been tutoring students aged eight to twenty-five for ten years, mainly in computer science but also in other subjects.

Operating Systems Windows, macOS, Linux. My current system runs Fedora Workstation 43.
